

WATER ALERT

June 29, 2009

Dear Resident:

As we are all aware, Spring Valley Village is experiencing drought conditions with no change in the long range forecast.

Therefore, I am asking each of you to reduce water consumption in our City. Even numbered house addresses are to water on even numbered days; odd numbers on odd days. Please water only between the hours of 8:00 p.m. and 6:00 a.m. All unnecessary outdoor use of water, such as washing cars, should be stopped until the drought conditions abate.

If we all work together to cut back on water usage, hopefully, more stringent, mandatory water conservation measures will not be needed.

Thank you for your cooperation!

Michael Andrews, Mayor
