FERGUSON[®]
WATERWORKS

As part of the City of Spring Valley Village's Advanced Water Meter Project, crews will be in the City to replace water meters from April through July. A bright blue door hanger will be left on your front door when your water meter is replaced with a new advanced water meter. The door hanger provides information concerning steps to take after your water meter has been upgraded. It is recommended that you flush your lines by turning on your bath tub's cold-water faucet or use an outside faucet prior to using your water. Avoid flushing from faucets that have aerator attachments or hot water faucets that may draw sediment into your water tank.

💧 The Water Meter Installation team vehicles will be clearly marked, and all crew members will wear uniforms and identification badges. No crew members will enter your home.

💧 If you are interested in a 2nd meter for your irrigation system, now is the time since it is cheaper now than it will be after this project is complete! Please contact City Hall at **713-465-8308**.

💧 For more information about the Advanced Water Meter Project or what to expect, visit www.springvalleytx.com or call City Hall at **(713) 465-8308**.

City of Spring Valley Village
1025 Campbell Road
Houston, Texas 77055

Benefits to You:

- 💧 Early leak detection and personalized water budgeting
- 💧 Access to a customer portal to easily monitor water usage and sign up for alerts

What to Expect:

- 💧 Your water will temporarily shut off during the meter replacement
- 💧 "USW" marked vehicles will be in the area over the deployment
- 💧 A door tag will left informing you the work has been completed
