

City of Spring Valley Village Advanced Water Meter Project

The City's Advanced Meter Water Project has been underway for several months. The first billing cycle for newly installed water meters went out to over 300 customers on July 3, 2019.

As of July 31, the installers installed 48% (1,108) of the new water meters and is displayed in the map below.

If an installer has replaced your smaller meter and you also have a larger meter that has not been replaced, an installer will return at a later date to replace it.

Once a water meter has been replaced, a blue door hanger is placed on your front door.

During the installation period, the City's installation contractor's clothing and vehicles will be clearly identified and marked with following: "Authorized Installation Contractor".

To view the project summary on the City's website, please [Click Here](#).

Thank you for your continued patience as we transition to the new water meter system.

If you have any questions, please call (713) 465-8308 or email utilities@springvalleytx.com.

July update for AMI Meter Installs
