SPRING VALLEY
V I L L A G E

January 23, 2020

Dear Resident:

As part of the Spring Valley Village Capital Improvement Program, Winningham Lane and Green Valley Drive (west of Voss Road) are scheduled for re-construction. This is to replace aging infrastructure and keep Spring Valley Village sustainable and viable. The Project will require the installation and construction of .23 miles of new pavement, underground storm sewers, and new water and wastewater lines.

The Engineer for this Project is Gessner Engineering, and they are currently in the design phase. Actual construction is not expected to start until the second quarter of 2020. However, you may see activity on your street that involves the gathering of information for purposes of design.

Closed circuit television video (CCTV) to inspect the sewer main line and determine the condition of the line is one of those activities. This process includes the cleaning of the sewer main line with a cleaning machine using high pressure that may cause a slight vacuum in the sewer line. The attachment contains information about the process and what you will need to do.

The cleaning and the use of CCTV for Green Valley & Winningham is scheduled for Wednesday January 29 and Thursday January 30, 2020.

We look forward to providing you with updates as this Project progresses. Should you have any questions, please feel free to call me at (713) 465-8308 or publicworks@springvalleytx.com.

Sincerely,

A handwritten signature in blue ink that reads "Pat Riley".

Pat Riley
Public Works Director
