

# Reminder Related to “Flushable” Products

As more people stay home, please remember to only flush toilet paper down the pipes. While so-called “flushable” wipes might flush easily, they can still cause clogs in the sewer pipes and can actually damage the City’s sewer equipment. Please dispose of all diapers, disposable cleaning wipes, baby wipes, paper towels, hygiene products and tissues in the trash. Thanks for helping in the protection of Spring Valley Village sewer system.
