SPRING VALLEY
V I L L A G E

January 28, 2026

The City of Spring Valley Village will begin roadway striping improvements on Bingle Road beginning February 2, 2026, weather permitting.

The work will take place between Westview Drive and West Memorial Park Drive and will reconfigure the roadway to one travel lane in each direction with a continuous center turn lane and dedicated bike lanes. This design was selected by City Council based on a traffic study prepared specifically for Spring Valley Village.

Work will include removal of existing pavement markings and installation of new striping. Traffic will be maintained using rolling barricades, and intermittent delays should be expected. Pavement marking operations cannot be performed during rain or when roadway temperatures are below 50 degrees Fahrenheit, so the schedule may be adjusted as needed.
